

KNMID Documentation

1. Initiate Request

Use the "InitiatePushRequest" method, which allows you to generate an access token, RequestID by providing **user credentials and civilID**. This token is necessary for clients to interact with the Other Ministries API. The "InitiatePushRequest" call must be made using **HTTPS and as a POST request**. Once you have obtained the token, you need to include it in the **authorization option for all subsequent API calls. Specifically, add it as a Bearer Token**. It's important to note that the generated token is valid for a single day only.

Request

Method	URL
post	https://knmid.media.gov.kw/api/InitiatePushRequest

Type	raw- JSON	Sample
Body	username password civilid	<pre>{ "username": "*****", "password": "*****", "civilid": "*****" }</pre>
	All field are mandatory	Username and password will be provided as per requested.

Response

Status	Response
200	<pre>{ "error": false, "access_token": "eyJhbGciOiJIUzI1NiIsInR5cCI6IkpXVCJ9.eyJzdWIiOiJKV1RTZXJ2aWNlQWNjZXNzVG9rZW4iLCJqdGkiOiJiMjg5NDc0NC0xNDNlLTQyMTEtOTFjNS1hYmMwYzEzMGVlZTMiLCJpYXQiOiIzMS8wNy8yMDIzIDEwOjE0OjE3IEFNiwiVXNlcklkIjoibSIzIlVzZXJOYWllIjoiyWRtaW4iLCJleHAiOjE2OTA4ODQ4NTcsImIzcyI6Imh0dHBzOi8vbG9jYWxob3N0OjQ0Mzk1LyIsImF1ZCI6Imh0dHBzOi8vbG9jYWxob3N0OjQ0Mzk1LyJ9.kPVPRD3XmoFrrgeH_GR5YSRRbxUzuN4TV7V2Z47fYXI", "civilID": "*****", "requesetID": "MOINFO-KNMID-*****-*****" }</pre>
200	<pre>{ "error": true, "status": "Fail", "message": "civil ID is IN-valid. Kindly check .." }</pre>

Note *

The authentication process initiated by the first API requires user authorization within a maximum time limit of 5 minutes. Therefore, the second API is required to make repeated calls for up to 5 minutes to check for the availability of the authentication result.

Get User Details

This method retrieves user information by providing the civilid and RequestID generated by the previous **"InitiatePushRequest"** method. To use this method, you need to make a POST request over HTTPS. When making the API call, include the generated token in the **authorization option as a Bearer Token**.

Request

Method	URL
POST	https://knmid.media.gov.kw/api/GetDetails

Type	raw- JSON	Sample Data
Body	<code>civilid</code> <code>requestID</code>	<pre>{ "civilid": "*****", "requestID": "MOINFO-KNMID-*****-*****" }</pre>
	mandatory	

Response

Status	Response
200 If resultCode=1 then this response.	<pre>{ "error": false, "requestId": "*****", "requestDate": "*****", "requestStatus": *, "requestType": "*****", "resultCode": "1", "messageAR": "success", "messageEn": "success", "userAction": "1", "requestUid": "*****", "paciRequestId": "*****", "civilID": "*****", "fullNameEn": "*****", "fullNameAr": "*****", "nationalityAr": "*****", "nationalityEn": "*****", "birthDate": "*****", "gender": "F", "mobileNumber": null, "emailAddress": null, "bloodGroup": null, "cardExpiryDate": "*****", "documentNumber": null, "passportNumber": null, "govMoireference": null, "govSponsorName": null, "governorate": null, "area": null, "pacibuildingNumber": null, "buildingType": null, "floorNumber": null, "buildingNumber": null, "blockNumber": null, "unitNumber": null, "authStatus": true, "streetName": null, "unitType": null }</pre>

	<pre> }</pre>																
200 If any other resultCode then this response.	<pre> { "error": true, "requestId": "MOINFO-KNMID-02082023-34", "civilID": "282052015595", "resultCode": "4", " messageAR ": "Declined ", "messageEn": "Declined ", }</pre>																
	*Note <table border="1"> <thead> <tr> <th>Result Code</th><th>Description</th></tr> </thead> <tbody> <tr> <td>1</td><td>Authenticated</td></tr> <tr> <td>2</td><td>Certificate Revoked</td></tr> <tr> <td>3</td><td>FailedToVerfiy</td></tr> <tr> <td>4</td><td>Declined</td></tr> <tr> <td>5</td><td>Certificate Expired</td></tr> <tr> <td>6</td><td>General Error</td></tr> <tr> <td></td><td></td></tr> </tbody> </table> With “Result Code” each result code “messageAR” and “message EN” will also provide. The authentication request is valid for 5 minutes only before it gets expired.	Result Code	Description	1	Authenticated	2	Certificate Revoked	3	FailedToVerfiy	4	Declined	5	Certificate Expired	6	General Error		
Result Code	Description																
1	Authenticated																
2	Certificate Revoked																
3	FailedToVerfiy																
4	Declined																
5	Certificate Expired																
6	General Error
